Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Hoyle's Modern Encyclopedia of Card Games

Hoyle discloses on pages 338-339 the game of Klondike.

Regarding claim 1

Hoyle teaches:

- a method of playing a solitaire game played with conventional playing cards;
- a set of game pieces (cards) grouped into at least four groups (clubs, hearts, diamonds and spades), a second means of ordering the game pieces (cards) in each group (2 through Ace) and a third means of grouping the game pieces (cards) into two independent groups (red and black cards);

Art Unit: 3711

- distributing the game pieces (cards) into a reserve area (starting area), a field area (area of game play) and a stock area (area for the pack of cards being used);
- moving the game pieces (cards) from the stock and reserve area into the field area such that the game pieces (cards) are ordered— consistent with the game of solitaire;

and

- moving the game pieces (cards) from the field area and stock area to the home area (area where the completes sets are placed).

Regarding claim 2

Hoyle teaches:

- groups with an equal number of game pieces (2 through Ace of each group - clubs, diamonds, spades and hearts).

102/103

Regarding claim 3

Hoyle teaches:

- second means in each group ordered (2 through Ace).

103

Regarding claim 4

- groups of the third means having equal numbers 26 red and 26 black cards).

Hoyle fails to explicitly teach that a board is provided in his game. It is however inherent in the game of Klondike solitaire that it is played on a surface which is adopted as the board of play. It would be obvious to use the surface upon which the game is played as the game board of play in this game.

Alternatively:

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoyle's Modern Encyclopedia of Card Games in view of Chernowski, Jr.

Hoyle discloses on pages 338-339 the game of Klondike.

Regarding claim 1

Hoyle teaches:

- a method of playing a solitaire game played with conventional playing cards;
- a set of game pieces (cards) grouped into at least four groups (clubs, hearts, diamonds and spades), a ^{first means} second means of ordering the game pieces (cards) in each group (2 through Ace) and a third means of grouping the game pieces (cards) into two independent groups (red and black cards);

- distributing the game pieces (cards) into a reserve area (starting area), a field area (area of game play) and a stock area (area for the pack of cards being used);
 - moving the game pieces (cards) from the stock and reserve area into the field area such that the game pieces (cards) are ordered— consistent with the game of solitaire;
- and
- moving the game pieces (cards) from the field area and stock area to the home area (area where the completes sets are placed).

Regarding claim 2

Hoyle teaches:

- groups with an equal number of game pieces (2 through Ace of each group - clubs, diamonds, spades and hearts).

Regarding claim 3

Hoyle teaches:

- second means in each group ordered (2 through Ace).

Regarding claim 4

103

- groups of the third means having equal numbers 26 red and 26 black cards).

Hoyle fails to explicitly teach that a board is provided in his game.

Chernowski, Jr. discloses Card Game components and Method of Play.

Chernowski, Jr. teaches a game board with includes a reserve are (a draw pile), a field area (memory area), a home are (program card area) and a stock are (storage area) – see figure 1 & abstract.

It would have been obvious to include the game board of Chernowski, Jr. with the Klondike Solitaire game disclosed by Hoyle for a more structured game play area.

Allowable Subject Matter

Claims 5-10 are allowed.

The following is an examiner's statement of reasons for allowance: Patentability has been found because the prior art fails to suggest or show the combination as set forth in the independent claim 5 including 'at least one strategy piece for use with the plurality of game pieces to indicate whether an individual game piece is needed;' This requirement is not seen or fairly suggested by the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kelly et al., Harper and Chernowski, Jr. are cited to show the state of art with respect to features of the claimed invention.
